

CETOL BL Deck & Wood Cleaner

Description: A fast-acting gel that takes just 15 minutes to revitalise and brighten grey and weathered timber.

General Notes

Main Characteristics:

- Ideal for large areas such as decking.
- Easy to use.
- Fast acting – takes just 15 minutes to brighten grey weathered timbers.

Use:

- To brighten and revitalise grey, weathered timbers in preparation for application of new coatings.

Application Data

Temperature of Application: Do not apply in temperatures below 5°C or if rain is due before the job is complete.

Method: Wet timber before application to delay drying out. Timber must stay wet during the whole application process.

Apply Cetol BL Deck & Wood Cleaner to surface to be treated. Work into the surface with an abrasive scrubbing pad or stiff bristle brush / broom.

Leave to stand until no further lightening occurs, but no more than 15 minutes. If timber begins to dry out, lightly spray with water to re-wet the surface.

Work manageable areas at a time to ensure the timber stays wet during the entire process.

Wash off with plenty of water using a hose until the water runs clear.

Allow the timber to thoroughly dry out – at least 3 days – before applying your chosen Sikkens finish.

Cleaning of Equipment: Remove as much of the product before rinsing equipment thoroughly in water.

Coverage Rate: Up to approx. 8m² per litre.

Depending on application method, the condition and nature of the surface.

Packaging: 1 and 5 litre cans.

Caution

Wear suitable protective gloves.

Avoid contact with grass and plants as it may cause browning or die-back. If contact occurs dilute with copious amounts of water.

Clean any spills while still wet.
